

BACK TO School

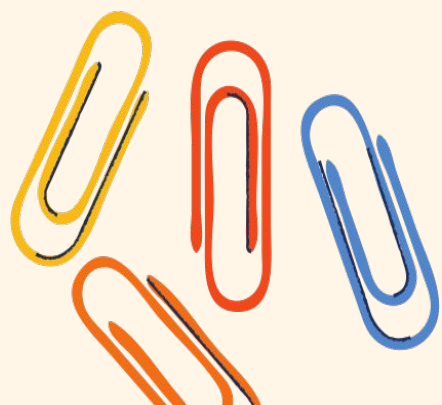

Join our online learning plan made freely accessible to all learners
anytime and anywhere.

Prepared by: Group XD

Problem

Our experiences in recent years since the onset of the COVID-19 pandemic have considerably changed the way we live our lives. The learning environment for most students and learners has shifted towards a digital education, but unfortunately some are unable to adopt this new way of learning due to educational barriers.

Stopped Education

These unprecedented events that occurred in the past few years has undeniably disrupted the educational system due to strict restrictions in crowded places, close-contact, and confined spaces, as well as a shifting towards a digital platform, and consequently causing some students to stop or postpone their education.

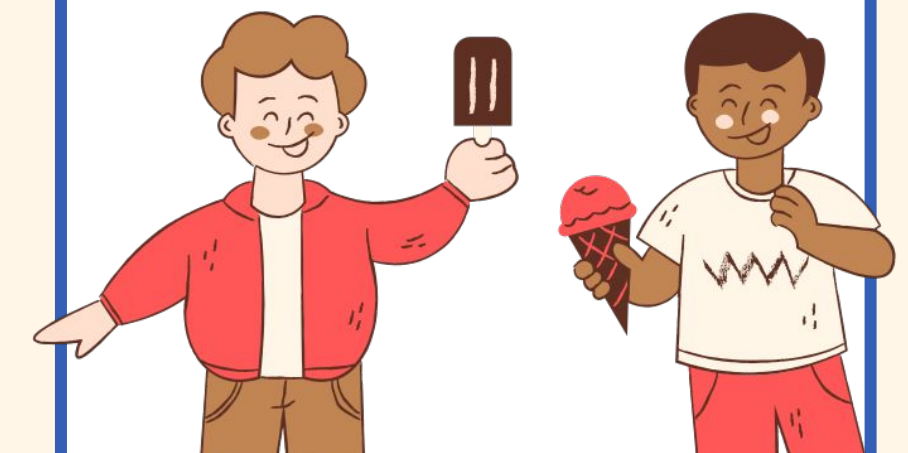

Difficulty Adjusting to Digital Environment

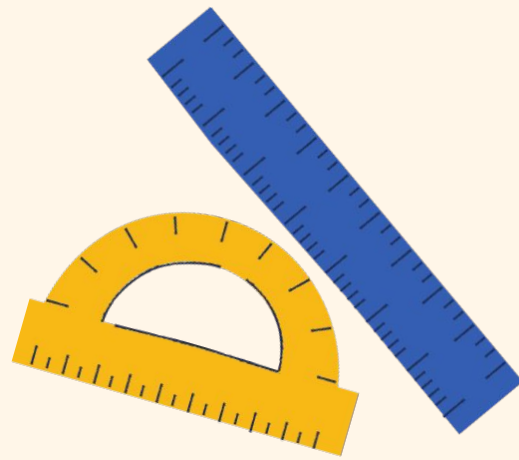

The on-going digital transformation in society, particularly in the education sector has been undoubtably challenging for some students who have no prior experience with modern technology.

Lack of Face-to-face Learning

A traditional education is definitely an important part of a student's life. The absence of face-to-face learning with instructors and fellow students can negatively impact a student's motivation, resulting in disinterested students.

Solution

Our goal is to assist in the education of students by contributing to the wealth of educational resources that are freely available online.

Free learning for all

To promote our goals by providing free and quality educational resources online, so that learners can have access to learning materials any time and place.

Easy to use

Usability and functionality is our main priority in designing our website, so that learners can easily transition to a digital learning environment.

Fun Visuals

To make learning lively and exciting, we added a lot of visuals and images to our lessons so that they are fun for learners.

Online Test Questions

In order to engage with our learners, we have end-of-lesson tests and exercises, so that we can evaluate our level of understanding the topics.
